

TIM BERNERS-LEE

THE FATHER OF Web

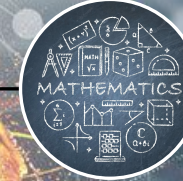

HOMEWORK

RICARDO D. AKA ORTINS

Tim Berners-Lee (The Father of Web)

Born on June
8 1955,
England

Family of
mathematicians
and scientists

Attended Oxford
University (Physics)

Joined CERN (European
Organization for Nuclear Research
in 1980) as software engineer

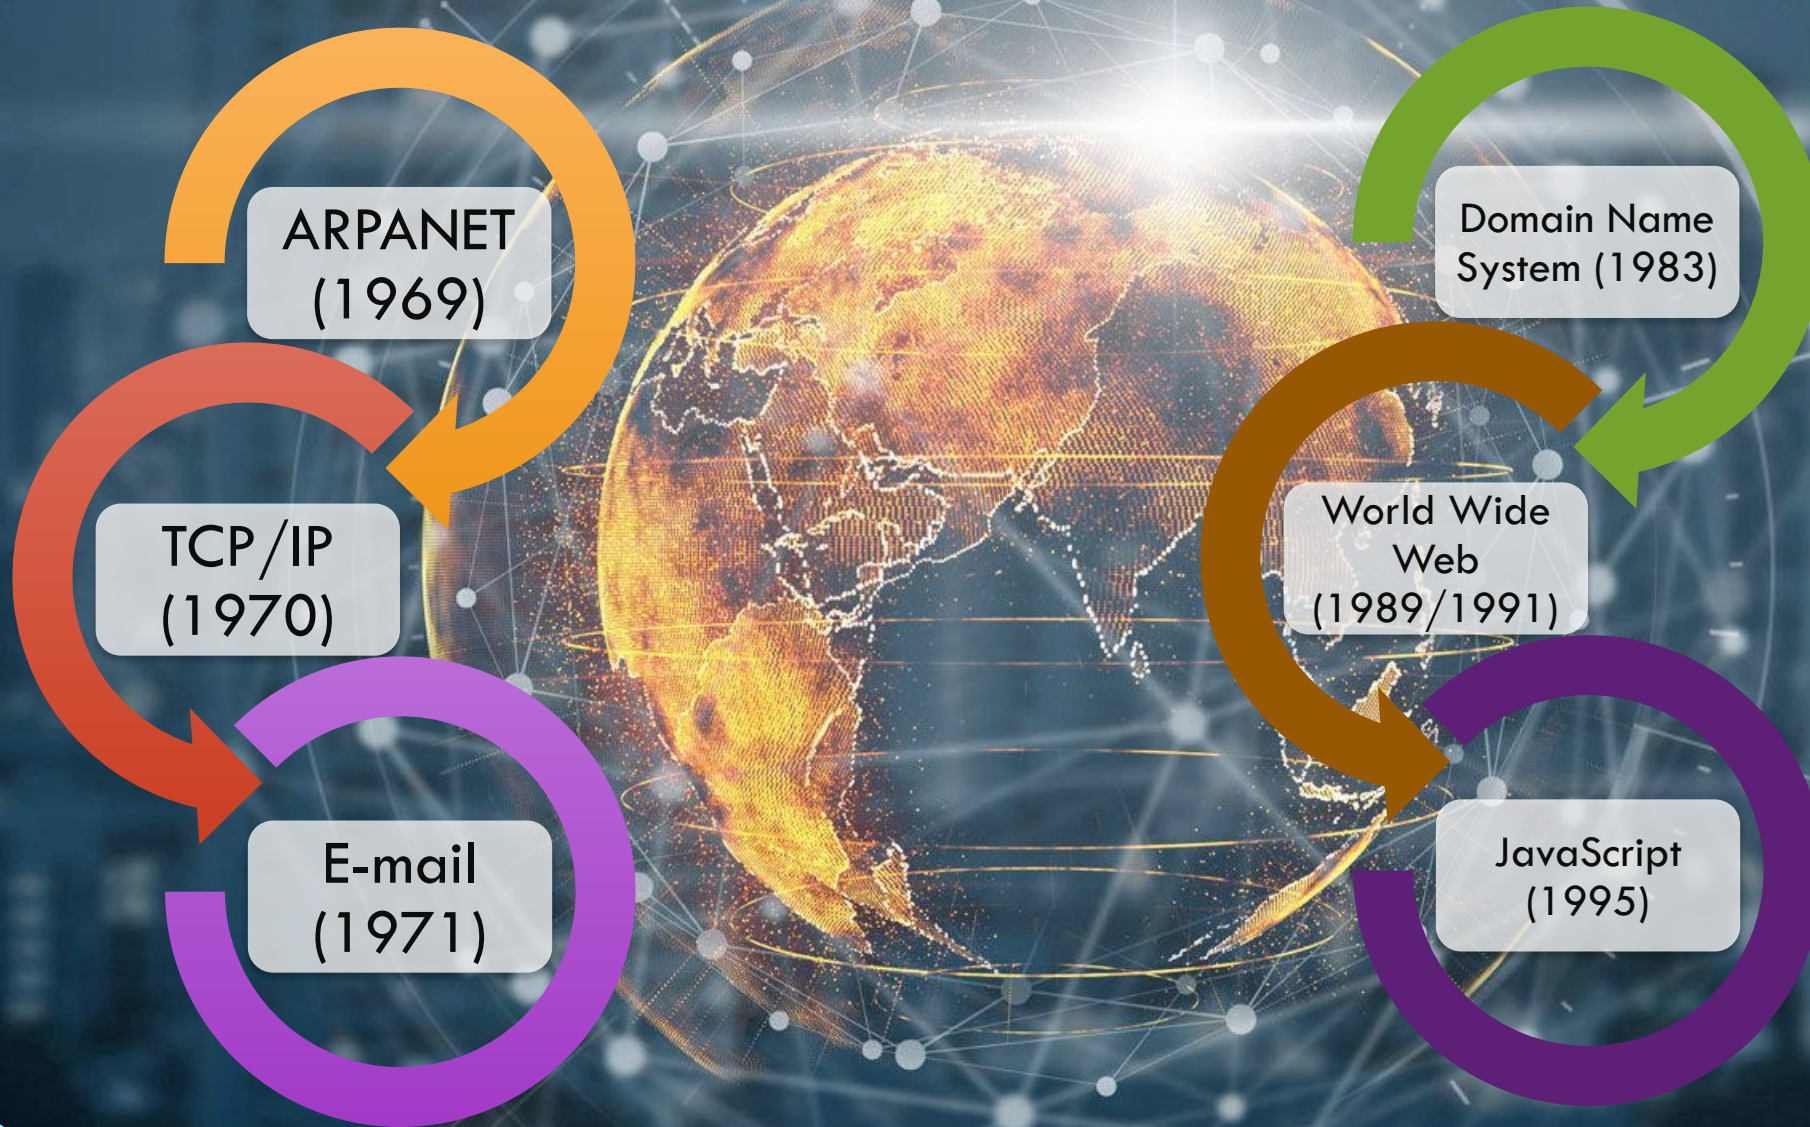

Invention of the
World Wide
Web in 1989

Development
of HTML and
HTTP

History of Internet

How Tim Berners-Lee reached the WWW idea

Tim was frustrated in late 1980 because:

- Difficulty of sharing information between different computers.
- Difficulty of sharing information other institutions around the world.

How Tim Berners-Lee reached the WWW idea

1

Isn't there a better way?

2

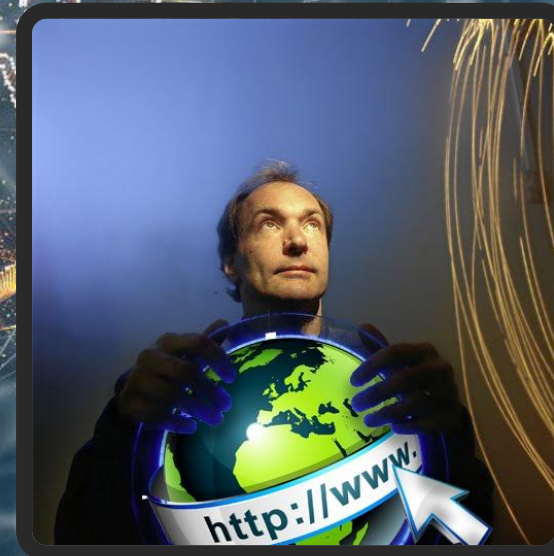

Can't We just fix this problem for good?

3

Can't we convert every information system so that it looks like part of some imaginary information system which everyone can read?

4

Did Tim Berners-Lee invented Web?

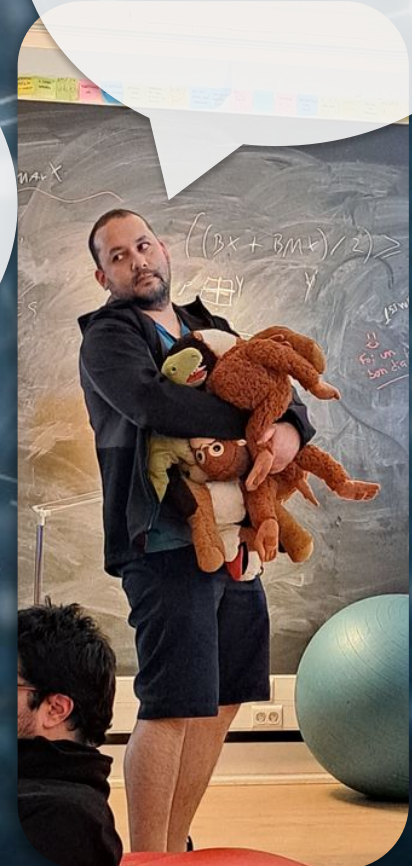

NO! NO! NO!

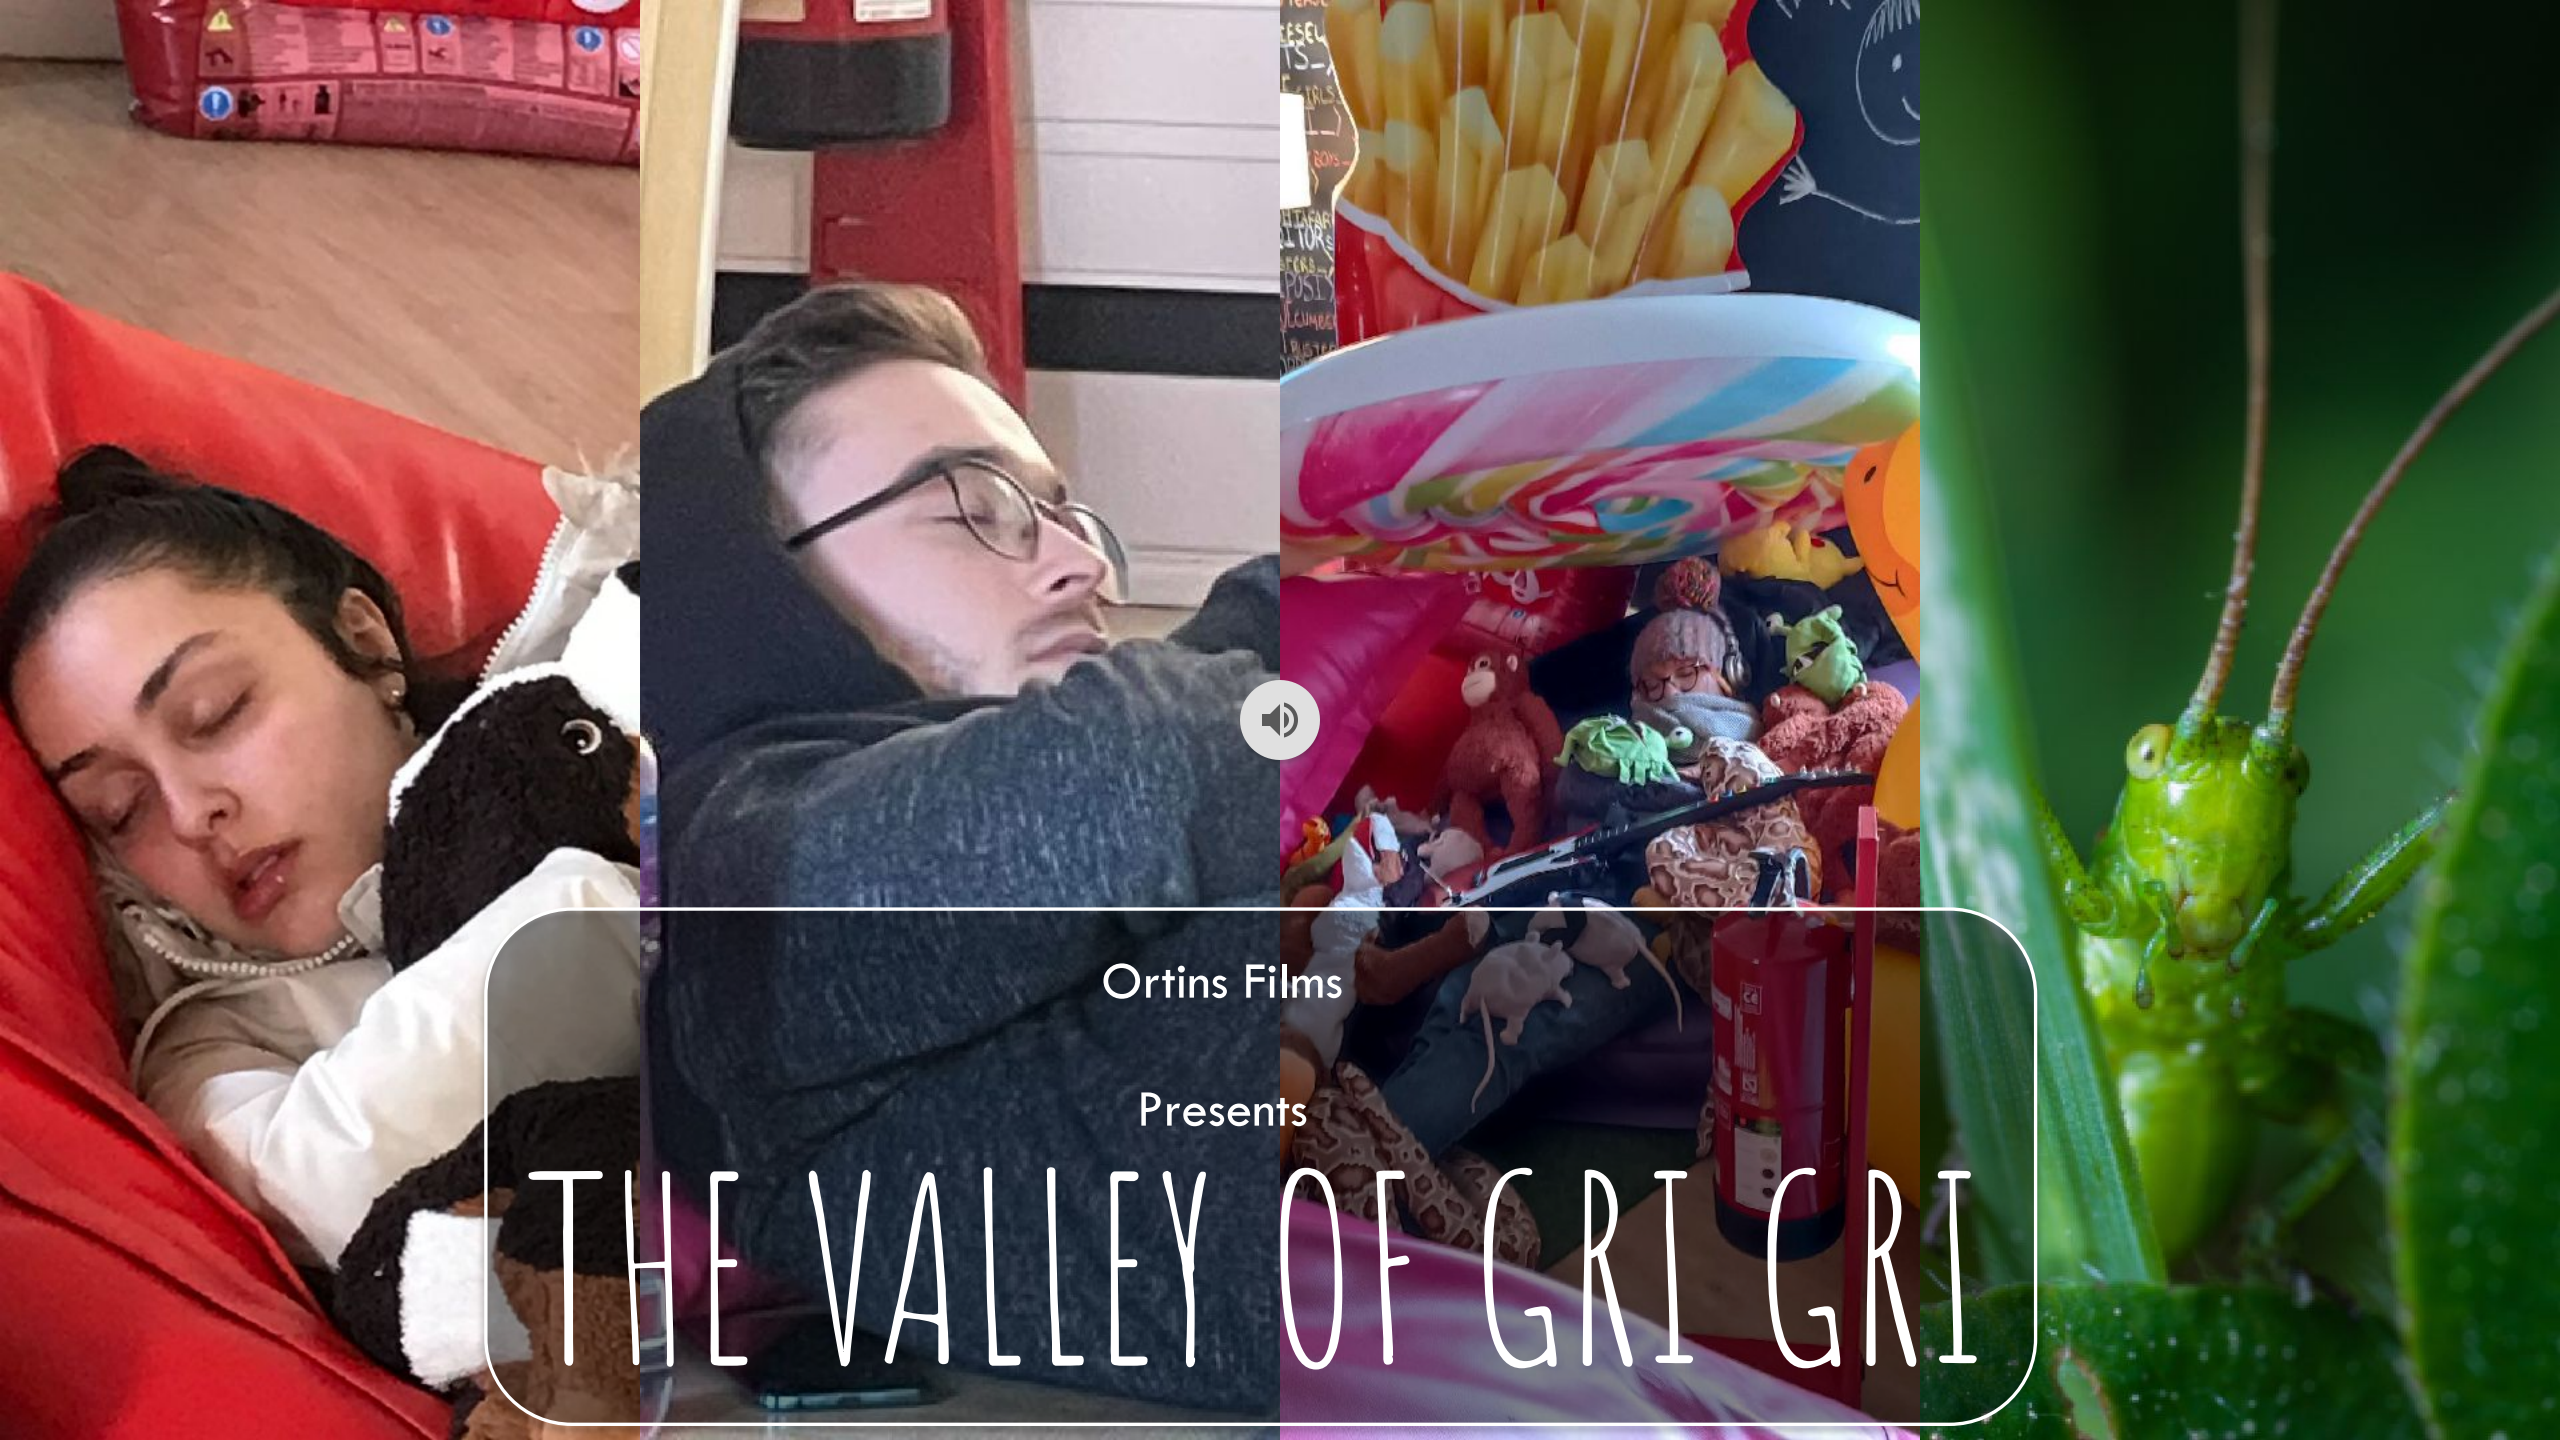

You Serious?

C'mon BRUH!!!

Ortins Films

Presents

THE VALLEY OF GRI GRI

Inventors of WWW

Vincent Cerf –
1970

TCP/IP

Paul Mockapetris
– 1980

DNS (Domain
Name System)

Vanevar Bush –
1945

Hypertext
before computers
really existed

Ted Nelson –
1960

Hypertext was
coined but didn't
used the internet

Doug Engelbart
– 1960

Hypertext similar
to WWW but
only in a big
computer

WWW – Tim Berners-Lee

= WWW

DNS

TCP/IP

Hypertext

When he invented the internet,
the first thing Tim Berners-Lee did

WWW Several Key Components

HTTP

Standardized
protocol to access
and share web
pages

URI/URL

Use of uniques
Adresses

HTML

Standardized
language for
web pages

Awards

- **Order of Merit (2004):** Berners-Lee was awarded the Order of Merit by Queen Elizabeth II.
- **Millennium Technology Prize (2004):** Berners-Lee was awarded the Millennium Technology Prize.
- **Queen Elizabeth Prize for Engineering (2013):** Berners-Lee was one of the **five engineers** awarded the inaugural Queen Elizabeth Prize for Engineering.
- **Turing Award (2016):** Berners-Lee was awarded the ACM Turing Award, often referred to as the **"Nobel Prize of Computing"**.
- **Webby Lifetime Achievement Award (2018):** Berners-Lee was awarded the Webby Lifetime Achievement Award, in recognition of his contributions to the development of the World Wide Web and the positive impact it has had on society.

Why Tim keep saying everything is so simple?

T B: Well, because it is basically.

T B: No, honestly...

T B: I want you to know that you too can make new programs which create new fun ways of using computers and using the Internet.

T B: I want you to realize that, if you can imagine a computer doing something, you can program a computer to do that.

T B: Unbounded opportunity... limited only by your imagination.

T B: And a couple of laws of physics.

T B: Of course, what happens with computers is that you have a basic simple idea and then you have to add things on to it for practical reasons. So real-world computer programs can end up with a lot of stuff in them. If they are good, they are still simple inside.

The End
