TOPICS

Servlets

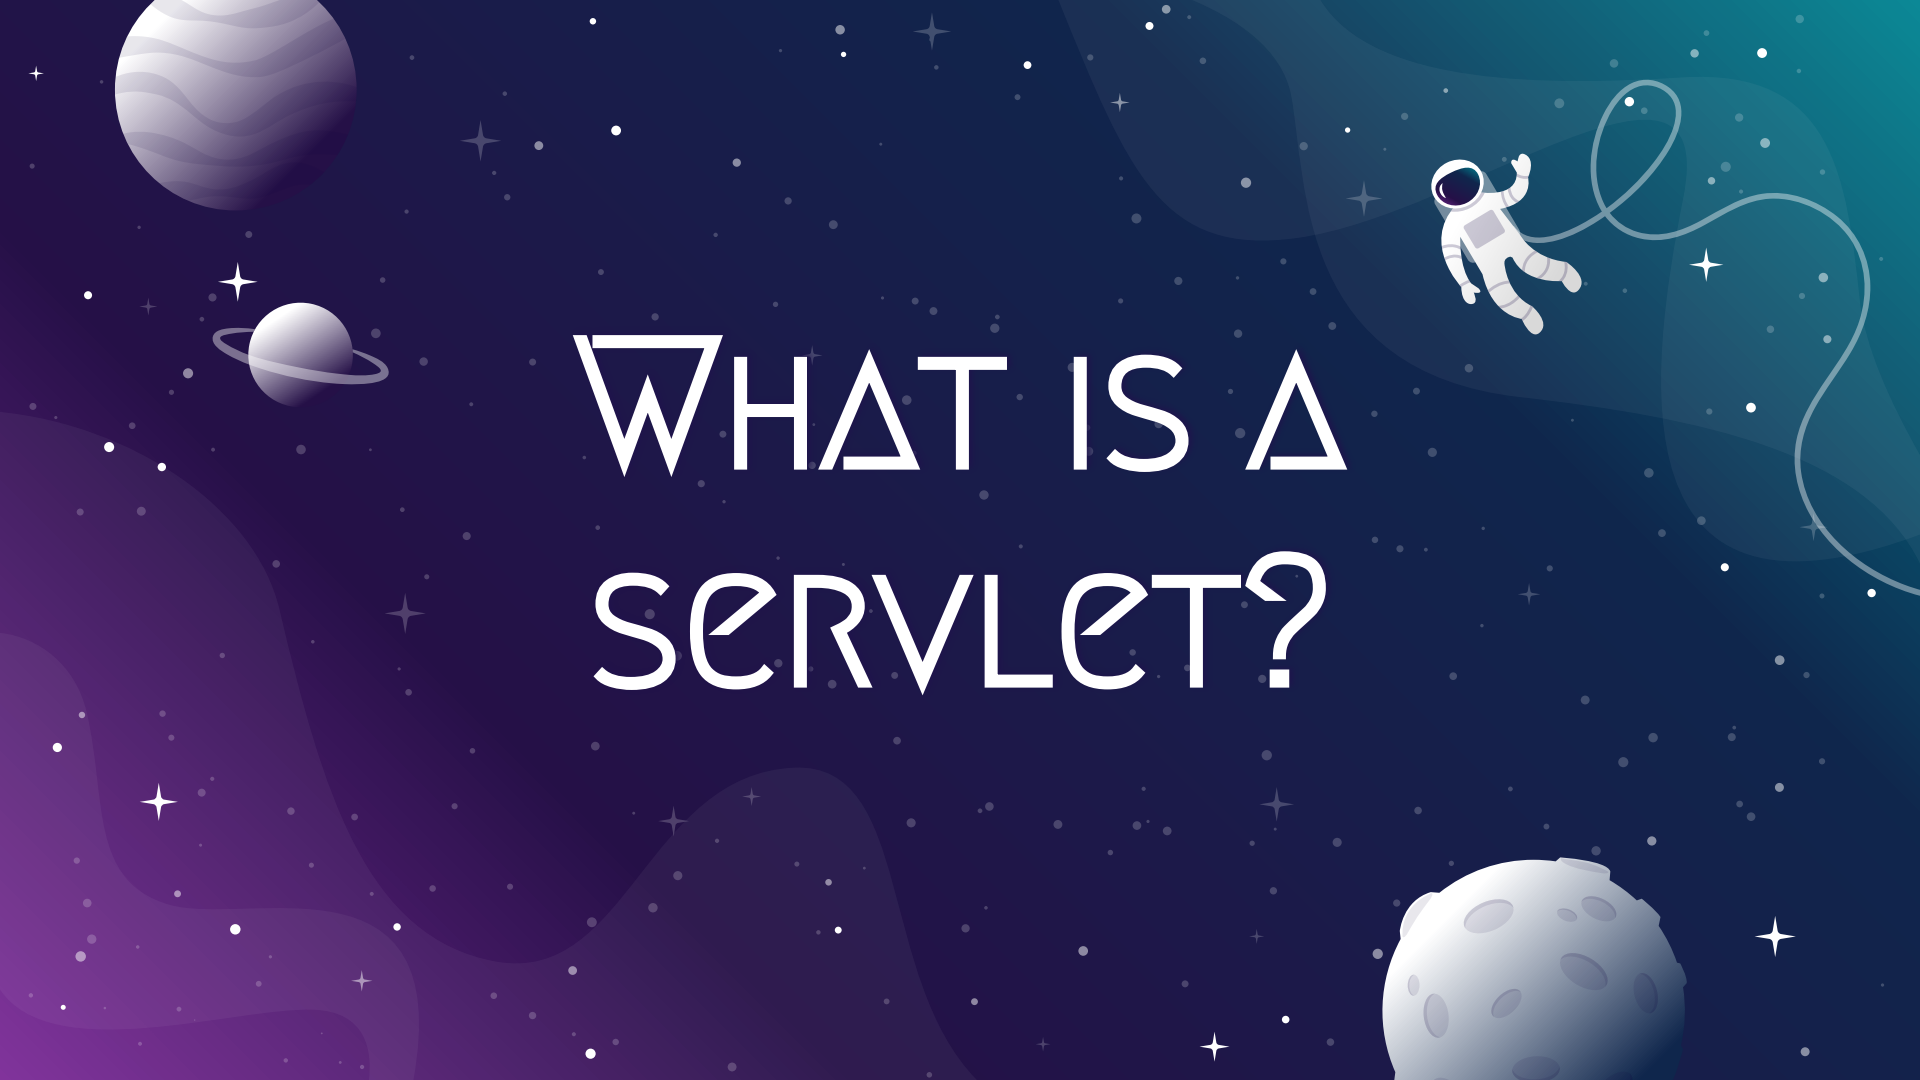

Tomcat

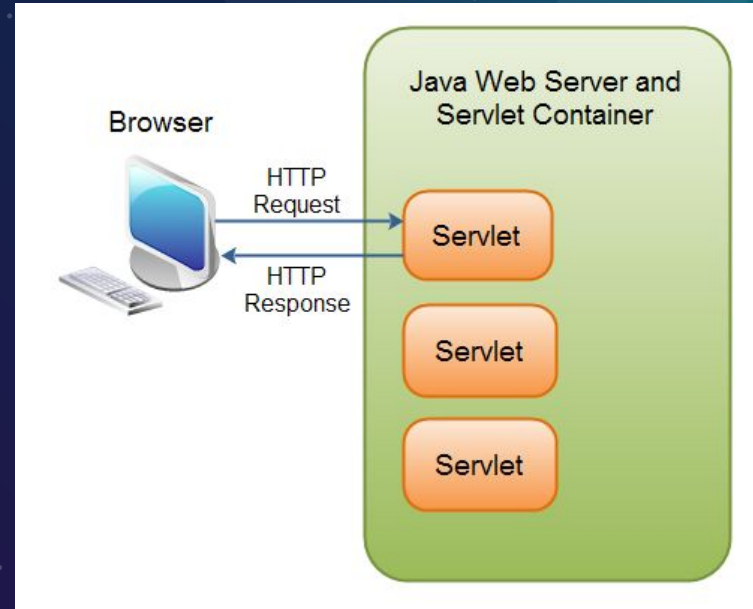

Exercise

WHAT IS A SERVLET?

SERVLET

- Java program that runs on a web server;
- Handles client requests;
- Generate dynamic web content.

SERVLET CLASS HIERARCHY

- **GenericServlet** - basic servlet functionality
- **HttpServlet** - class abstract, providing functionality to implement HTTP requests
- **ServletConfig** - object used by a servlet container to pass information to a servlet

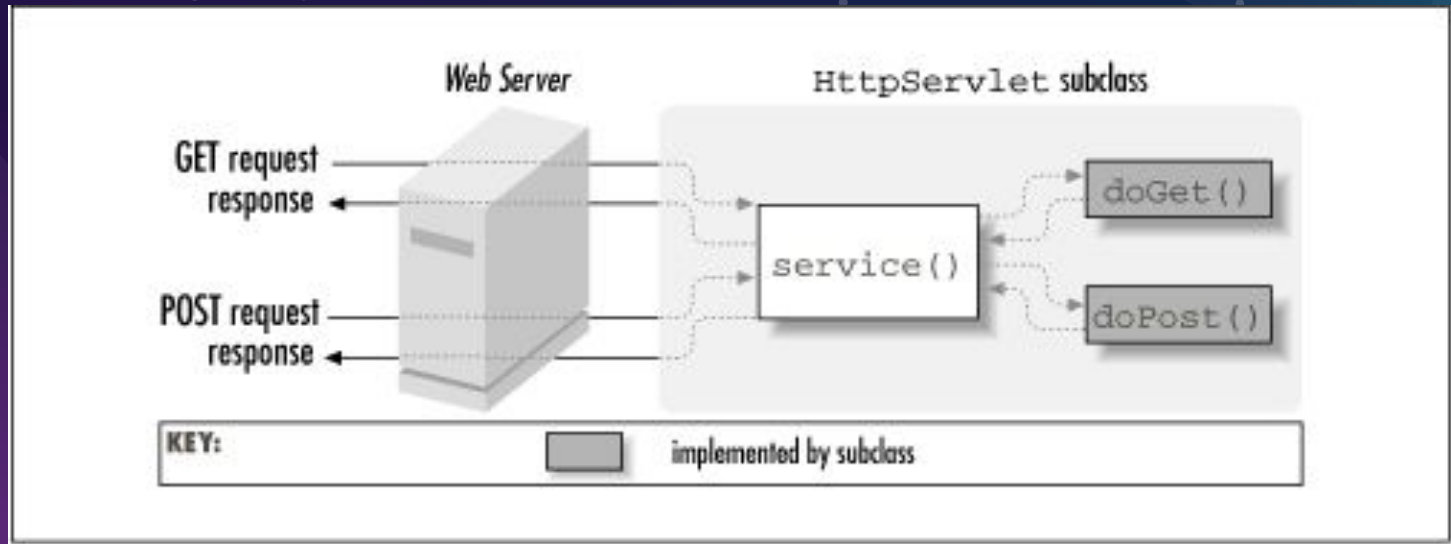

Servlet interface

Generic Servlet

HttpServlet

MyServlet

HTTPServlet

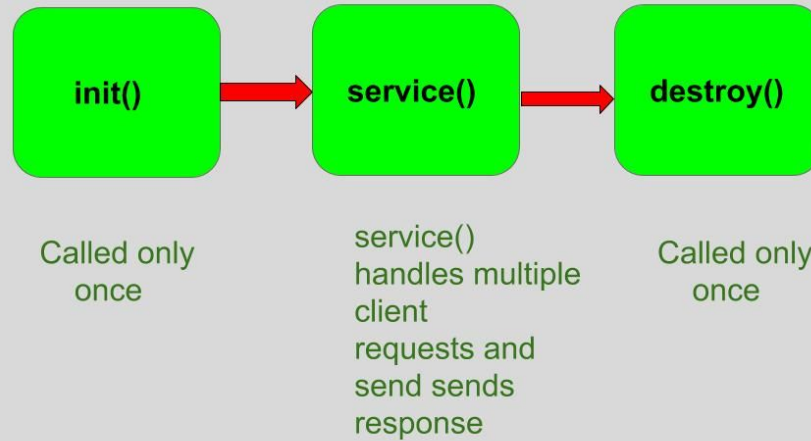

SERVLET API

- Is used on a server to
- interact with other pages.
- It communicates with the clients through a request and response format or system in a servlet container.

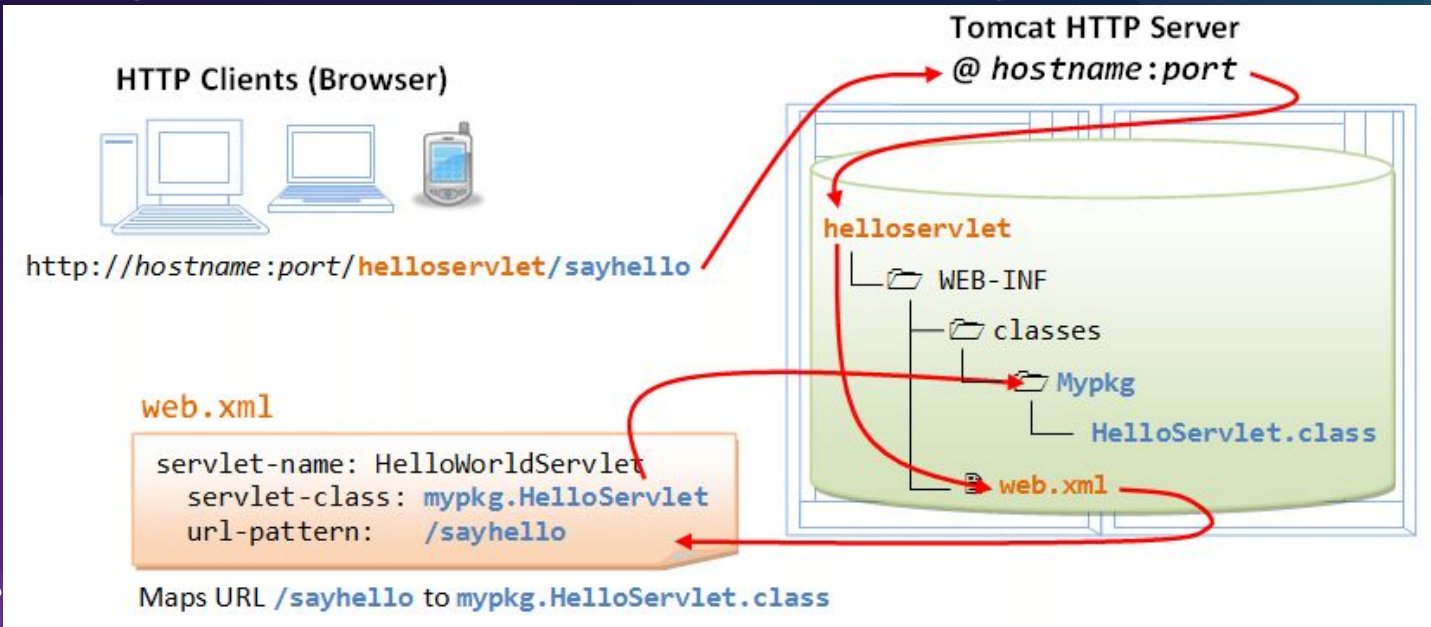

SERVLET Lifecycle

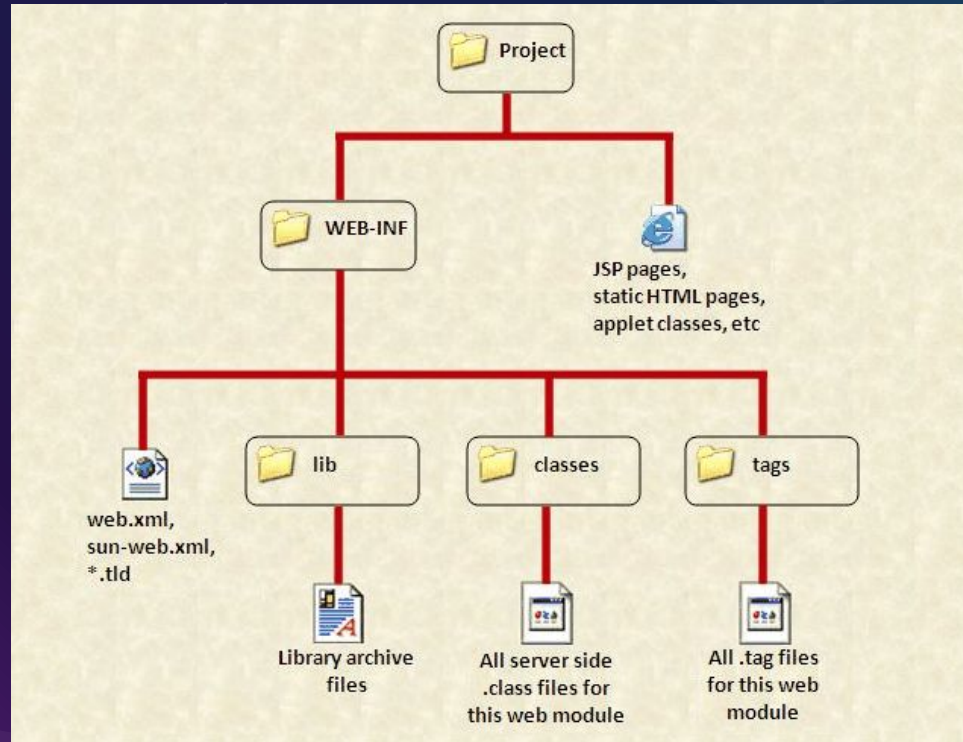

Life cycle methods of a Servlet

SERVLET URL MAPPING

WEB APPLICATIONS DIRECTORY STRUCTURE

WEB APPLICATION ARCHIVE

JAR files allow us to package multiple files in order to use it as a library, plugin, or any kind of application. On the other hand, WAR files are used only for web applications.

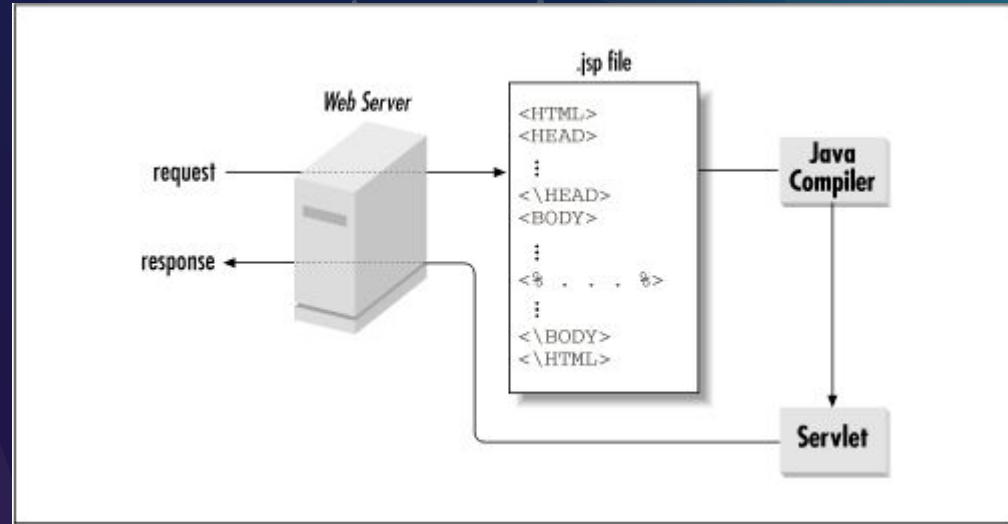

MAVEN TOMCAT PLUGIN

- Web server and servlet container that implements the Java servlet and JSP.
- Acts as a bridge with TomCat optional components and the web server.

JAVA SERVER PAGES

Is a Java standard technology that developers use to write dynamic, data-driven web pages for Java web applications.

EXERCISE

EXERCISE

```
public class Customer {  
  
    private int id;  
    private String firstName;  
    private String lastName;  
    private String email;  
    private String phone;  
  
    public Customer(int id, String firstName, String lastName, String email, String phone) {  
        this.id = id;  
        this.firstName = firstName;  
        this.lastName = lastName;  
        this.email = email;  
        this.phone = phone;  
    }  
}
```

```
public class ControllerServlet extends HttpServlet{  
  
    Customer c1 = new Customer(1,"Luis","Reis","ola@gmail.com","91748293");  
  
    @Override  
    protected void doGet(HttpServletRequest req, HttpServletResponse resp) throws ServletException,  
        IOException {  
        RequestDispatcher dispatcher = req.getRequestDispatcher("WEB-INF/pages/index.jsp");  
        req.setAttribute("customer", c1);  
        dispatcher.forward(req,resp);  
    }  
}
```

EXERCISE

```
<div class="card" style="width: 18rem;">
  <div class="card-header">
    My little Card!
  </div>
  <ul class="list-group list-group-flush">
    <li class="list-group-item">Hi ${customer.firstName} ${customer.lastName}</li>
    <li class="list-group-item">Your email is -> ${customer.email}</li>
    <li class="list-group-item">Your phone is -> ${customer.phone}</li>
  </ul>
</div>
```

CSS

EXERCISE

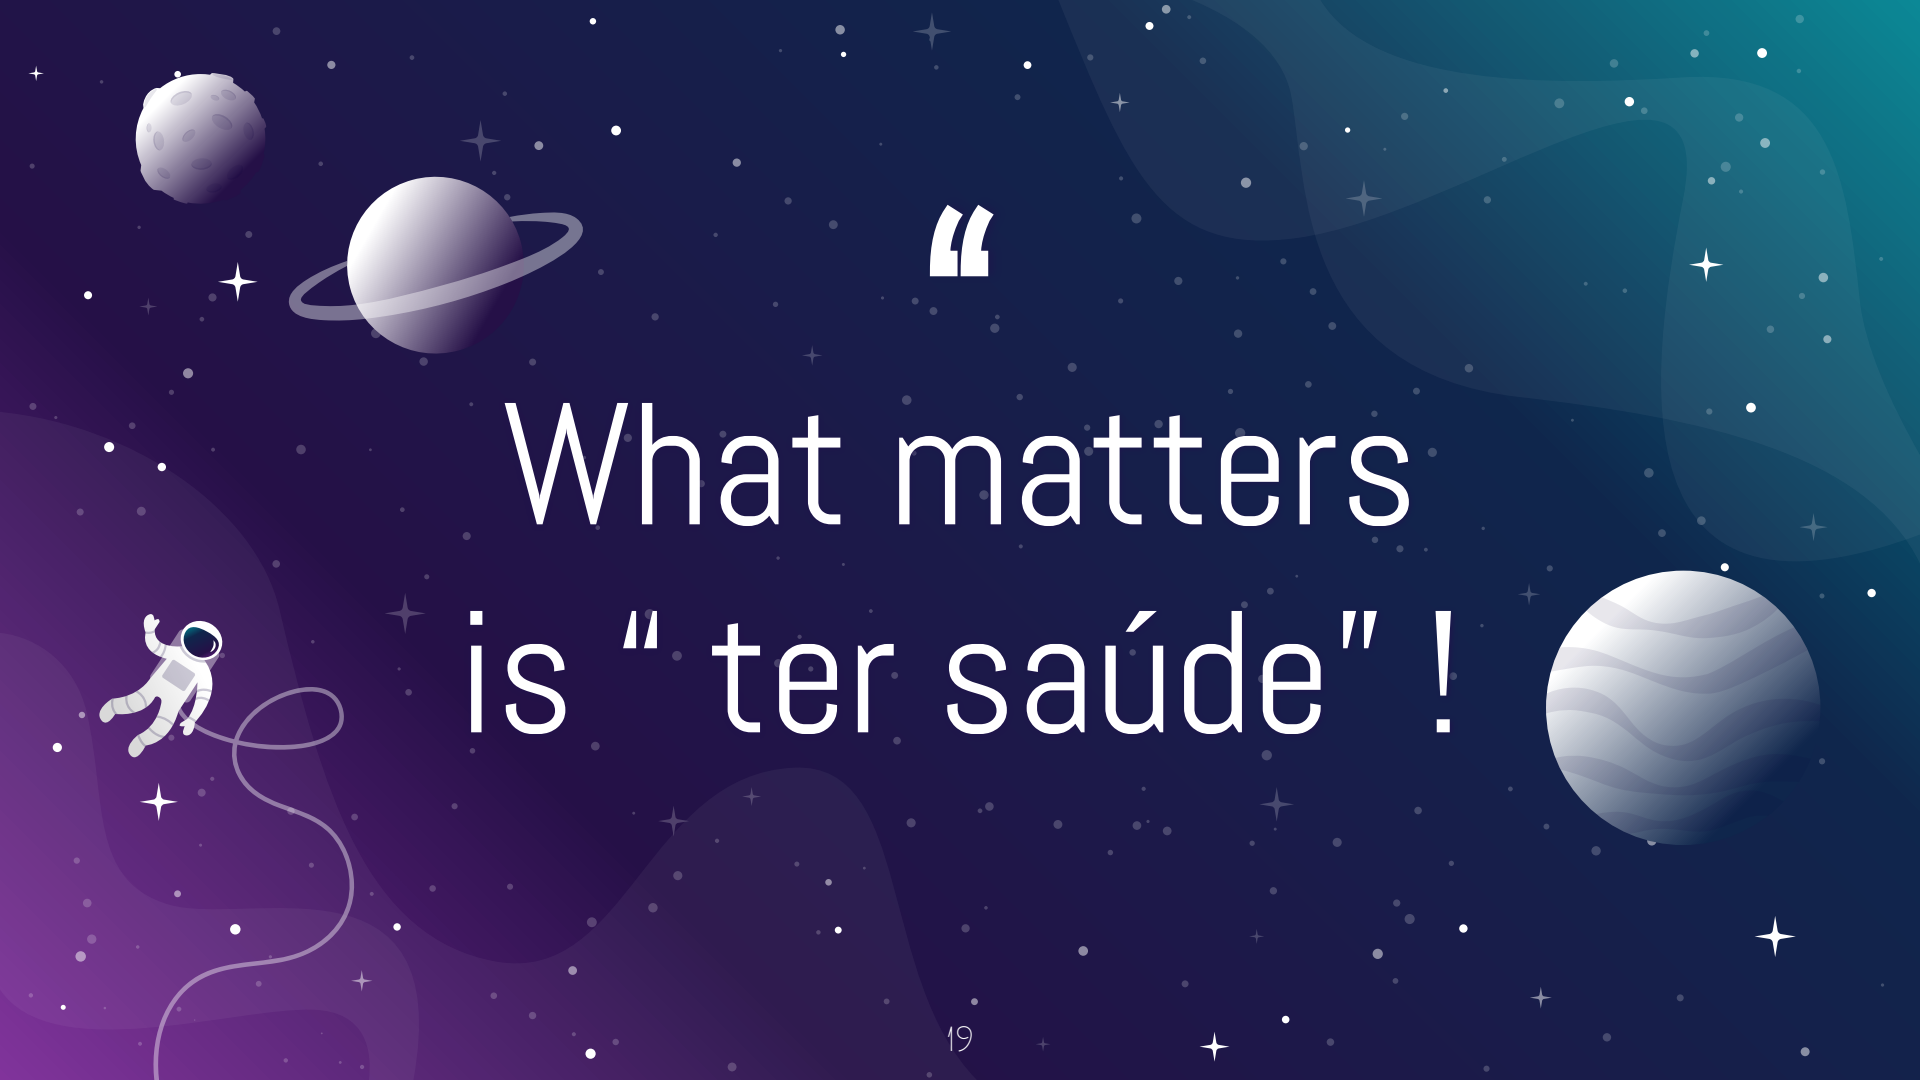

```
<div class="card" style="width: 18rem;">
  <div class="card-header">
    My little Card!
  </div>
  <ul class="list-group list-group-flush">
    <li class="list-group-item">Hi ${customer.firstName} ${customer.lastName}</li>
    <li class="list-group-item">Your email is -> ${customer.email}</li>
    <li class="list-group-item">Your phone is -> ${customer.phone}</li>
  </ul>
</div>
```

My little Card!

Hi Luis Reis

Your email is -> ola@gmail.com

Your phone is -> 91748293

The background is a deep purple and blue space scene. It features several celestial bodies: a cratered moon in the top left, a ringed planet (like Saturn) in the top center, and a striped planet (like Jupiter) in the bottom right. Numerous white stars of varying sizes are scattered across the sky. In the bottom left, a small astronaut in a white suit is floating, holding a long, thin, white rope that loops around. The overall aesthetic is clean and modern.

“

What matters
is “ter saúde” !

THANKS!
