Silvério aka Cristiano

Aaron Swartz was born on November 8, 1986 in Chicago, USA.

He was interested in computers, programming and the Internet at an early age. He started creating his own projects and collaborating with other developers online.

He loved to learn, he was very curious from a very young age

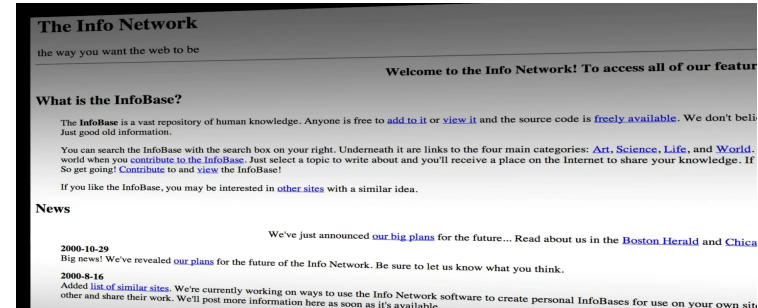

At the age of three, he was already playing with computers

Swartz began programming at age 12 and, at age 14, co-founded the web standards advocacy group RSS(Really Simple Syndication), that allows users to receive updates from websites and blogs

He was 15 when he created the site "the info" in 2002.

Some companies where Aaron worked:

1. Wired Digital***
2. Creative Commons***
3. Reddit***
4. Infogami ***
5. Open Library***
6. Jottit
7. Watchdog.net
8. Progressive Change
Campaign Committee
9. Avaaz
10. Google
11. Demand Progress***
12. Tor Project
13. Free Software Foundation
14. Wikimedia Foundation
15. Electronic Frontier Foundation
(EFF)

Aaron was obsessed with programming always sought out how to improve his code and defends it

He was a programmer and technology activist known for his work in creating web standards, founding technology companies, and fighting for freedom of information.

When they thought he had reached his goal, he was already in a new challenge

Information is
power. But like all
power, there are
those who want
to keep it to
themselves

JSTOR Case

Co-authored the "Open Access Manifesto" advocating for free access to academic papers

In 2011, Swartz was arrested on wire fraud charges for downloading millions of academic papers from the JSTOR database using the MIT network. He intended to make these articles freely available to the public.

He faced charges that could result in a prison sentence of up to 35 years and heavy fines. Swartz pleaded not guilty to the charges

SOPA Case

Swartz was one of the leading activists in the fight against the proposed Stop Online Piracy Act (SOPA)

He believed that the law was a threat to freedom of expression and innovation on the Internet

Swartz actively participated in the campaign against SOPA, contributing to the organization of online and offline protests and helping to mobilize public opinion against the law
SOPA was eventually filed after a wide mobilization of online activists

Tragic End:

Aaron committed suicide on January 11, 2013

He is believed to have suffered from depression and anxiety, aggravated by the legal problems arising from the JSTOR..

His death sparked a huge outcry in the online community and among digital rights activists. Many criticized the US government for excessive persecution against him

Legacy

Aaron Swartz's legacy is multifaceted.

He was an activist and advocate for freedom of information and the open Internet, who believed that access to information should be free and democratic.

He was a pioneer in technology and made significant contributions to web programming and design.

Aaron was also a tireless political activist who fought for issues such as Internet privacy, reform of the criminal justice system, and the defense of civil rights.

Aaron Swartz
1986 – 2013

“He was the
Internet's Own Boy,
and the Old World
killed him.”
