

A stylized, painterly illustration of Richard Stallman. He has long, wavy brown hair and a full, grey beard. He is wearing a dark jacket with a red button visible. He is holding a black handgun in his right hand, which is raised towards the top right corner of the frame. A small flame or smoke is visible at the muzzle of the gun. The background is a warm, brownish-yellow color with some faint, abstract shapes. The overall style is reminiscent of a digital painting or a high-quality illustration.

Intuitive and dreamy, Pisces feel best in a position where their creative skills will come to the fore or working for a higher cause through creative charity events. Occupations that fit Pisces are compassionate and filled with faith and devotion, so they make excellent priests, doctors, veterinarians, musicians, painters and any career that involves working in the shadows. Undercover and hidden, they could have a lot of fun playing certain parts and hiding their true identity.

Pisces are very friendly and often find themselves in company of very different people. They are selfless and always willing to help others, a very fine intent for as long as they don't expect anything much in return. People born with their Sun in Pisces have an intuitive understanding of the life cycle and form incredible emotional relationship with other humans on the basis of natural order and senses guiding them.

Currently living in Massachusetts, he speaks english, french, spanish and some indonesian. Also he doesn't care about money and he has said he prefers to be childless. Although he truly believes that open source is the way, he doesn't believe that much in open relationships.

“ I'd like to meet a woman with varied interests, curious about the world, comfortable expressing her likes and dislikes (I hate struggling to guess), delighting in her ability to fascinate a man and in being loved tenderly, who values joy, truth, beauty and justice more than "success"--so we can share bouts of intense, passionately kind awareness of each other, alternating with tolerant warmth while we're absorbed in other aspects of life.
