Home Work

ChatGPT

Examples

"Explain quantum computing in simple terms"

"Got any creative ideas for a 10 year old's birthday?"

"How do I make an HTTP request"

Capabilities

Remembers what user said earlier in the conversation

Allows user to provide follow-up corrections

Trained to decline inappropriate requests

Limitations

May occasionally generate incorrect information

May occasionally produce harmful instructions or biased content

hey chat i have a homework about you, talk about you

Hello! As an artificial intelligence language model developed by OpenAI, I am known as ChatGPT, short for Generative Pre-trained Transformer. My main purpose is to generate text, answer questions, and complete sentences autonomously. I have been trained on a vast amount of textual data using machine learning techniques to understand the structure of natural language and produce coherent and plausible text.

One of the most exciting things about me is my ability to be used in various applications, such as virtual assistants, chatbots, and language translation. My technology has the potential to revolutionize the way we interact with computers and each other using natural language.

However, like any technology, I have some limitations. For example, I may perpetuate biases and lack the ability to understand linguistic nuances. But my creators at OpenAI are constantly working to address these challenges and improve my performance.

Overall, I am a powerful language model that continues to evolve and improve. I am honored to be a part of the ongoing progress in the field of artificial intelligence, and I hope to continue making positive contributions to the world of natural language processing.

Thank You

Who is OpenAI

OpenAI is an artificial intelligence research company that aims to create safe and beneficial artificial general intelligence (AGI) for all of humanity

The creators of OpenAI are a group of entrepreneurs, investors and researchers who came together to found a non-profit artificial intelligence research company in 2015. Among them are Sam Altman, Elon Musk, Peter Thiel, Reid Hoffman and Jessica Livingston

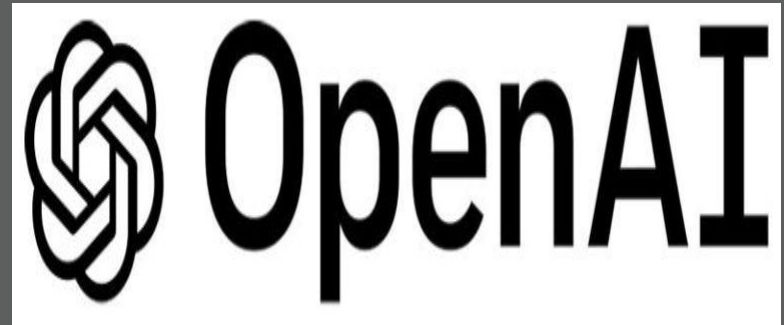

Sam Altman is the CEO of OpenAI

... And Chat GPT

ChatGPT was released on
November 30, 2022

ChatGPT is an AI-powered chatbot that uses OpenAI's GPT-3.5 language model, an improved version of GPT-3. In March 2023, OpenAI released GPT-4, a more advanced version of the model that serves as the basis for ChatGPT². GPT-4 is only available to those who subscribe to ChatGPT Plus

... And Your Success

On December 4(just in 5 days), OpenAI estimated that ChatGPT already had over one million users.

For comparison with other companies:

41 months

25 months

10 months

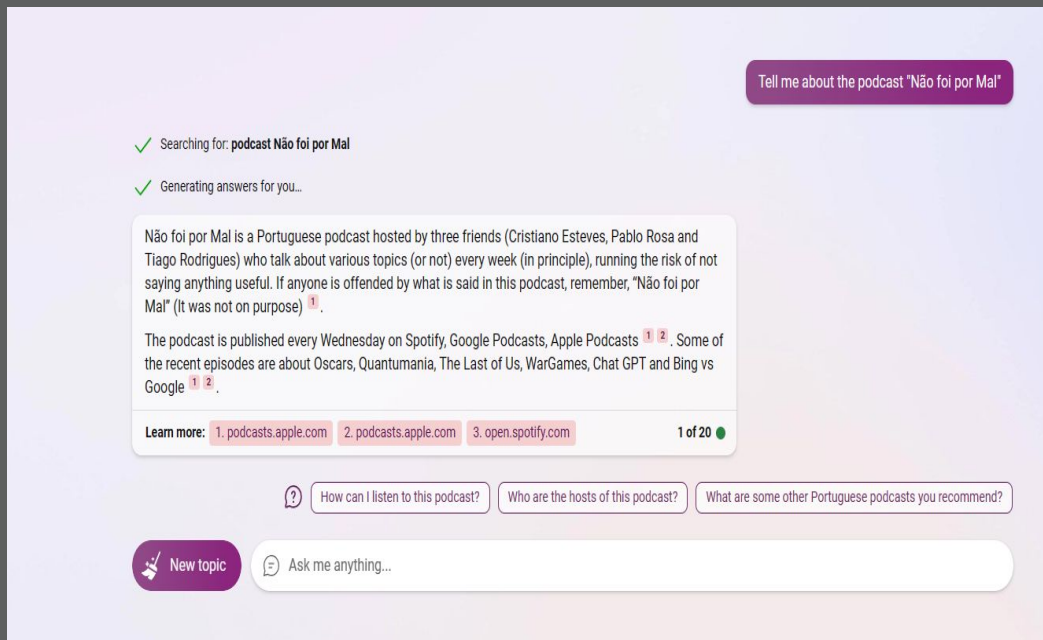

The OpenAI and Microsoft partnership

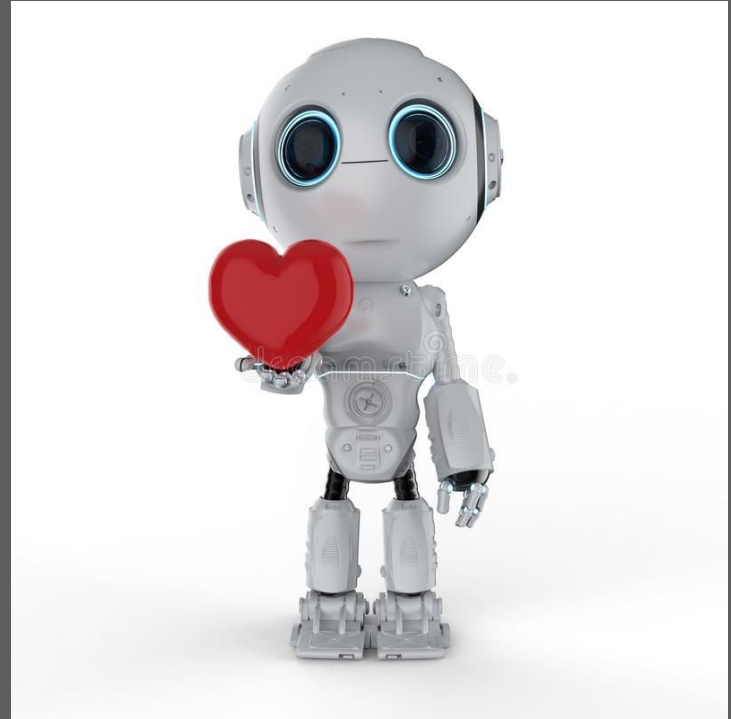

Is a long-term collaboration to accelerate artificial intelligence (AI) research and development and democratize access to advanced AI technologies.

Microsoft deploys OpenAI models in its consumer and enterprise products and services such as Bing, Power BI, GitHub Copilot, Microsoft Designer, and Azure OpenAI Service.

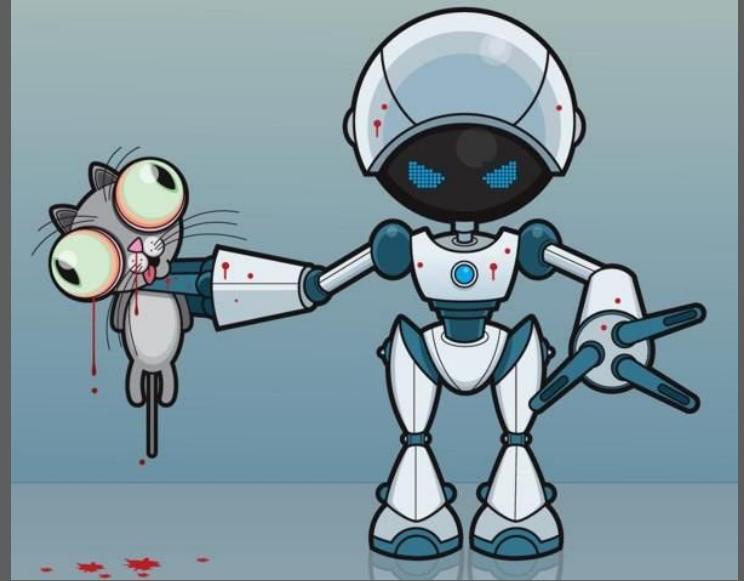

Chat GPT Good

- It can generate detailed and articulate responses in natural language using OpenAI's GPT-3.5 or GPT-4 language model.
- It can handle a variety of topics and tasks, from casual conversation to writing code, composing music, generating images and much more.
- It can adapt to the user's style and tone using reinforcement learning and personalization techniques.
- He can remember previous prompts given to him in the same conversation and maintain coherence and relevance.

Chat GPT Bad

- Digital media company BuzzFeed will use GPT to generate personalized content for its website, and will lay off approximately 15% of its employees.
- ChatGPT has been considered a threat to democracy by some analysts, who fear the program could be used to generate misinformation, manipulate opinion and influence elections.
- The undersigned to stop AI development is an open letter that was posted on the Future of Life Institute website on March 29, 2023. The letter was signed by over 1300 artificial intelligence experts and technology industry executives such as Elon Musk, Steve Wozniak, Yuval Noah Harari and others.

Thank you,
Now it's serious!!
