

ACADEMIA DE CÓDIGO

SUMMARIZER

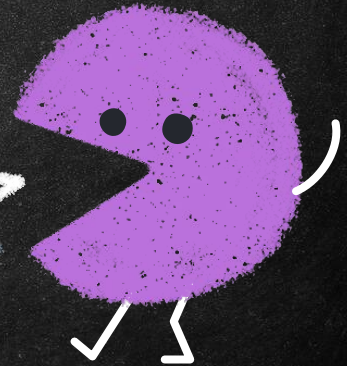

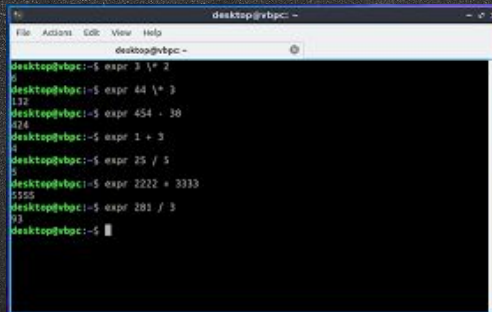

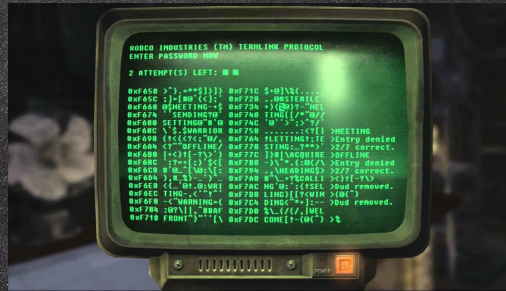

2023 - 01 - 18 - Valter

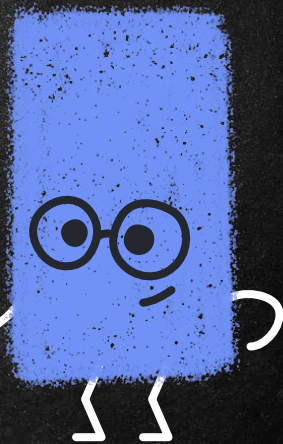

INPUT / OUTPUT DEVICES

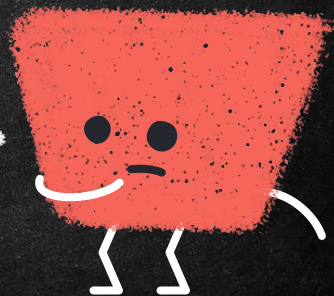

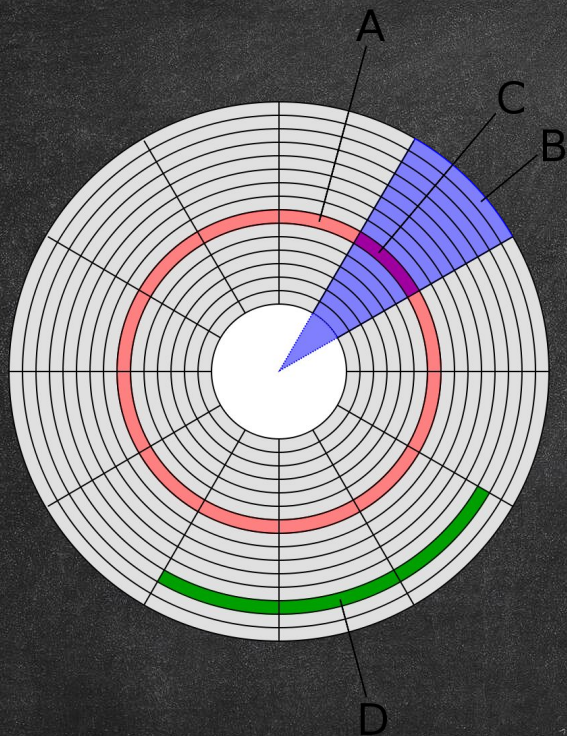

TERMINAL EVOLUTION

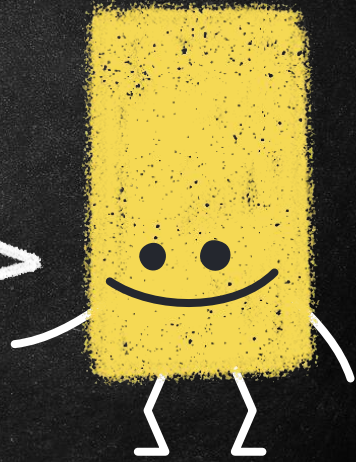

Storage Memory

HARD DISK STRUCTURE

OPERATING SYSTEM

WHAT AN OS DO?

controls all the
computer resources

Manage the
execution of
application
programs

Shields the
programers
from the
complexity of
the hardware

Provides users
with line
command line
and graphic
interface

UNIX

The Godfather

WHO WROTE IT?

access to
multiple
users

Multi Tasking

Was the first
portable
Operating
System

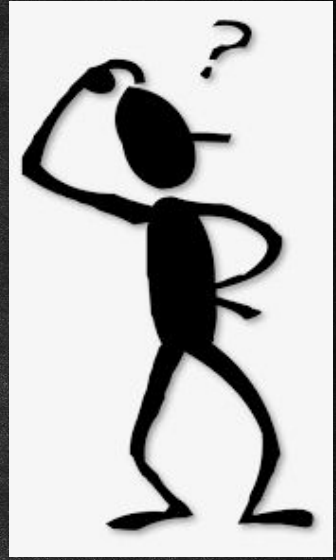

WHAT IS WHAT?

Defines the structure and the rules use to read, write maintain and maintain data on Disk

.... is an program in execution in memory

..... sequence of instruction and a lightweight

ALSO.....

Secure Shell connection

That is a cryptographic
network connection

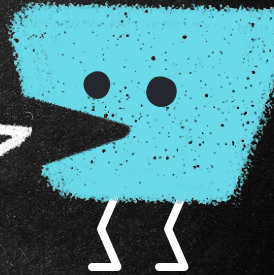

SSH - authenticate
Protocol

SCP - copy files

Memory Management

Physical Memory

Virtual Memory
