

GOOD MORNING !!

GOOD MORNING SUNSHINE!

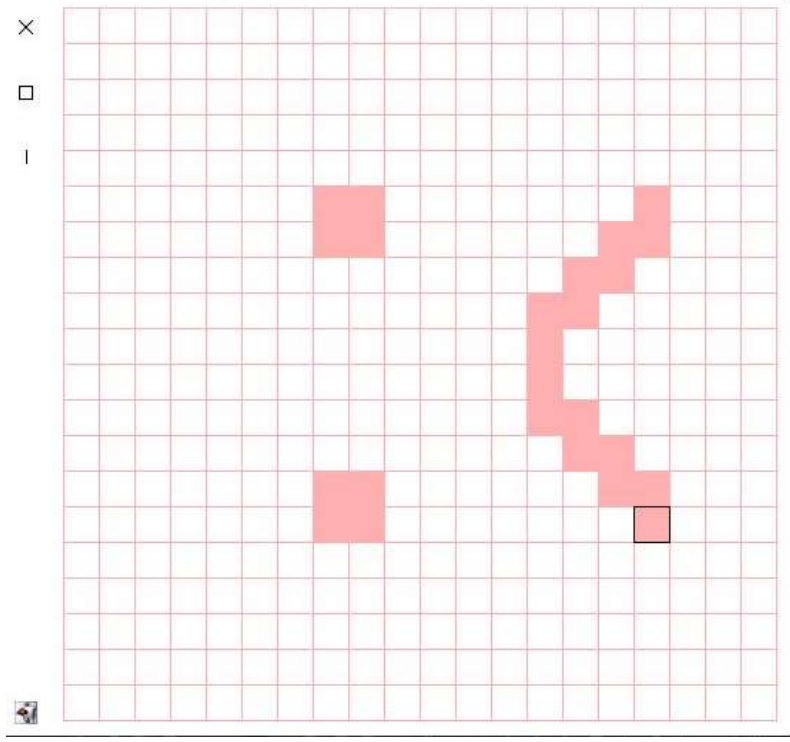

BY. JOÃO RIBEIRO

THE CHALLENGE...

CHALLENGE ACCEPTED

THE BEGIN...

ENTER THE MATRIX !!!

```
private int incrX;
private int incrY;

Rectangle [][] matrix = new Rectangle[20][20];
public void matrix(){
    int incrX=10;
    int incrY=10;

    for (int i = 0; i < matrix.length; i++) {
        for (int j = 0; j < matrix.length; j++) {
            matrix[j][i] = new Rectangle(incrX, incrY, 25, 25);
            incrX += 25;
            matrix[j][i].setColor(Color.PINK);
            matrix[j][i].draw();
        }
        incrY += 25;
        incrX=10;
    }
}
```

DECLARE CURSOR

```
switch(keyboardEvent.getKey()){
    case KeyboardEvent.KEY_D:
        player.moveRight();
        break;
    case KeyboardEvent.KEY_A:
        player.moveLeft();
        break;
    case KeyboardEvent.KEY_S:
        player.moveDown();
        break;
    case KeyboardEvent.KEY_W:
        player.moveUp();
        break;
    case KeyboardEvent.KEY_SPACE:
        location();
        break;
```

```
public Player(int iniX, int iniY, int x, int y){
    rectangle1 = new Rectangle(iniX, iniY, x, y);
    rectangle1.setColor(Color.BLACK);
    rectangle1.draw();
}

public void moveRight() {
    if (rectangle1.getX() < 475) {
        rectangle1.translate(25, 0);
    }
}

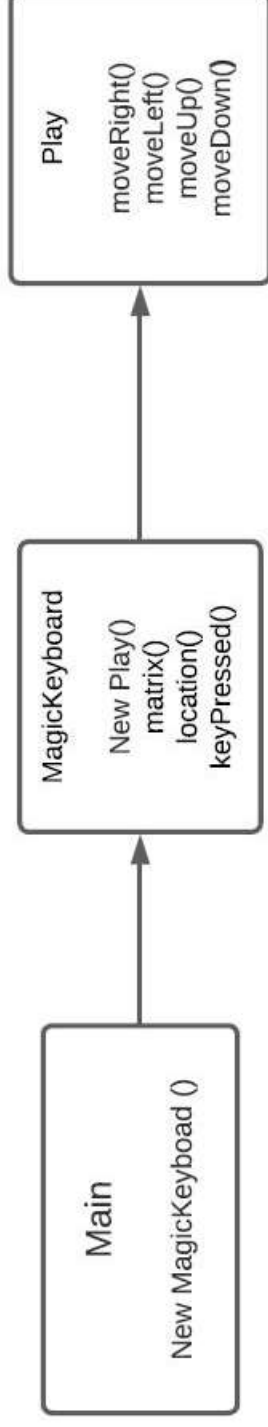

public void moveLeft() {
    if (rectangle1.getX() >= 25) {
        rectangle1.translate(-25, 0);
    }
}

public void moveUp() {
    if (rectangle1.getY() > 20) {
        rectangle1.translate(0, -25);
    }
}

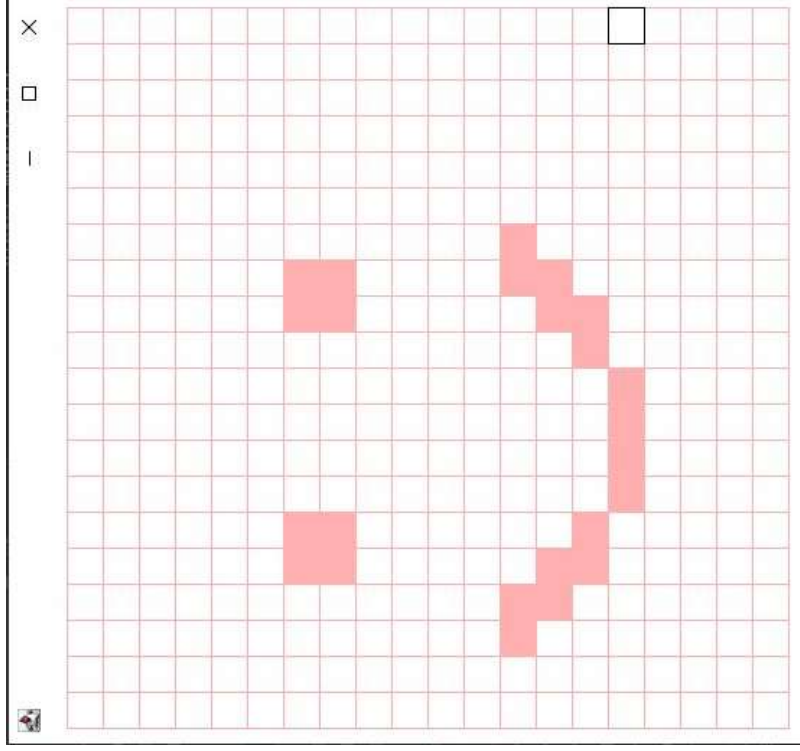

public void moveDown(){
    if(rectangle1.getY()<475){
        rectangle1.translate(0,25);
    }
}
```

MORE CODE... :/

```
public void location(){  
    posX = ((player.getX()-10)/25);  
    posY = ((player.getY()-10)/25);  
    matrix [posX][posY].fill();  
}
```

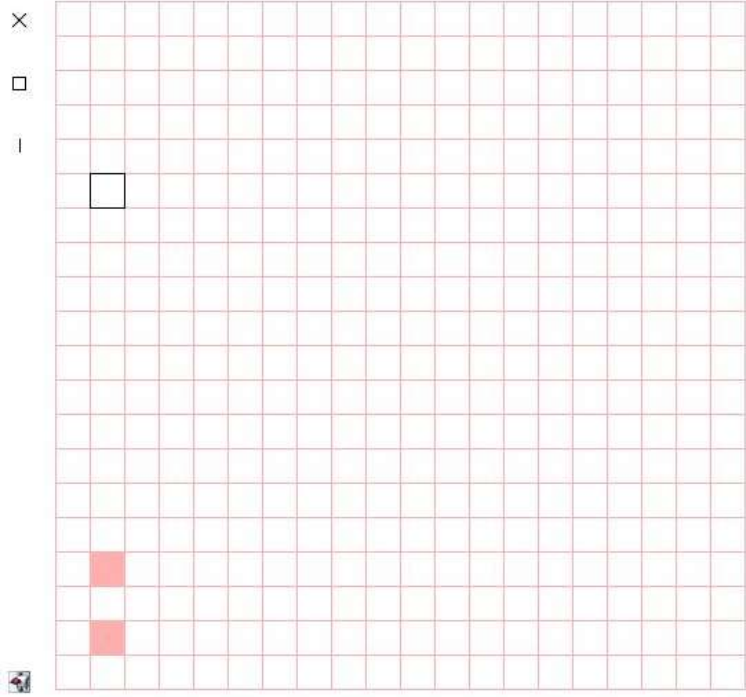

MORE CODE... BUT NOW FEELING BETTER

PLEASE DON'T GIVE UP !! IT'S ALMOST OVER...

void	<code>delete()</code> Deletes this rectangle
void	<code>draw()</code> Draws this rectangle.
void	<code>fill()</code> Fills this rectangle.
int	<code>getHeight()</code> Gets the height of this rectangle.
int	<code>getWidth()</code> Gets the width of this rectangle.
int	<code>getX()</code> Gets the leftmost x-position of this rectangle.
int	<code>getY()</code> Gets the topmost y-position of this rectangle.
void	<code>grow(double dw, double dh)</code> Resizes this rectangle both horizontally and vertically.
void	<code>paintShape(java.awt.Graphics2D g2)</code> Paints the shape
void	<code>setColor(Color newColor)</code> Sets the color of this rectangle.
java.lang.String	<code>toString()</code>
void	<code>translate(double dx, double dy)</code>

Thanks !!
