Transport Layer

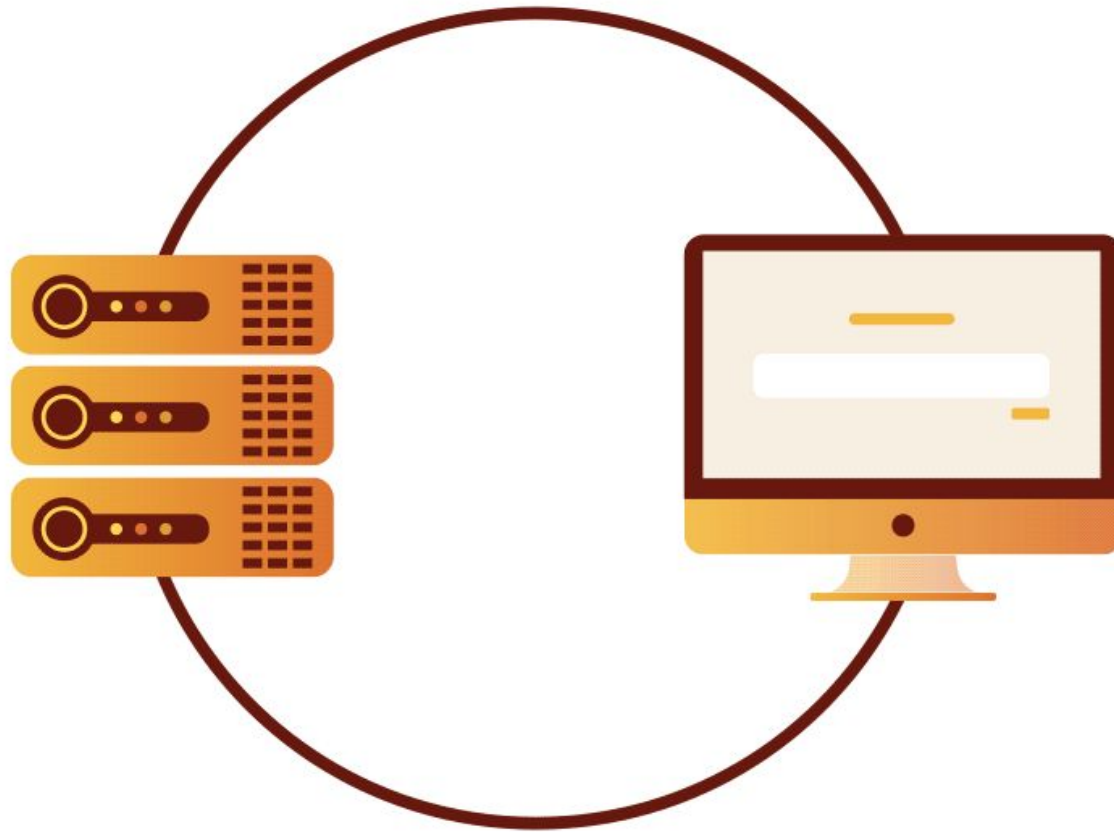

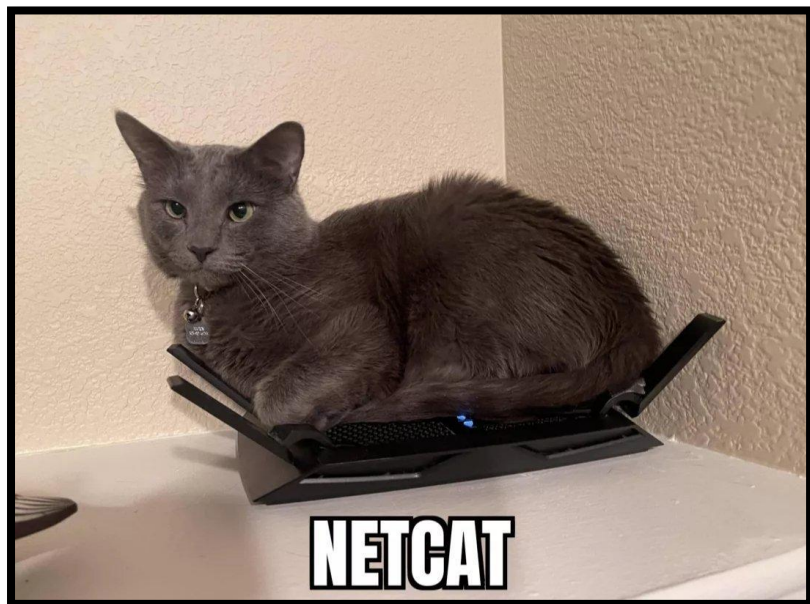

Label on Column	Service Name	UDP and TCP Port Numbers Included
DNS	Domain Name Service – UDP	UDP 53
DNS TCP	Domain Name Service – TCP	TCP 53
<u>HTTP</u>	<u>Web</u>	<u>TCP 80</u>
HTTPS	Secure Web (SSL)	TCP 443
SMTP	Simple Mail Transport	TCP 25
POP	Post Office Protocol	TCP 109, 110
SNMP	Simple Network Management	TCP 161,162 UDP 161,162
TELNET	Telnet Terminal	TCP 23
FTP	File Transfer Protocol	TCP 20,21
SSH	Secure Shell (terminal)	TCP 22
AFP IP	Apple File Protocol/IP	TCP 447, 548

- Local IP address
- Local Port number
- Remote IP address
- Remote Port number

Domain Name System (DNS)

Using Netcat for the first time

UDP:

User_1

`nc -L "PORT"`

User_2

`nc "IP" "PORT"`

TCP:

User_1

`nc -UL "PORT"`

User_2

`nc -u "IP" "PORT"`

Send Files:

`nc "IP" "PORT" < "send_file"`

Thank you!
