Waterfall Model

Expectation

Reality

-
- One lifecycle
 - Phase not over until all stakeholders accept it
 - Strict structure (Difficult to go back)

SCRUM

THREE MAIN SCRUM ROLES

Represents the
stakeholders

Middle man

Deliver the product

SPRINT

Event of 1 – 4 weeks in which your Scrum team focuses only on a sprint goal.

The goal is typically a product increment or iteration — often an updated, improved version of your product or software.

KANBAN

Priority Management

Quick release

LEAN

Popular on small companies like startups

Very quick & small cycle of dev.

Test first

Unified Modeling Language (UML)

Is a **modeling language** not a programming language

Helps software developers to:

- visualize,
- construct,
- and document new software systems and blueprints.
